## Diagnostic Block Evaluation Tool

The purpose of this tool is to evaluate the efficacy of the nerve block performed today. Please fill in the first section to establish your typical baseline pain symptoms. The second section is to be filled out after the procedure to determine if there were any changes in these symptoms. Please bring this sheet with you to your follow-up appointment.

Procedure: \_\_\_\_\_

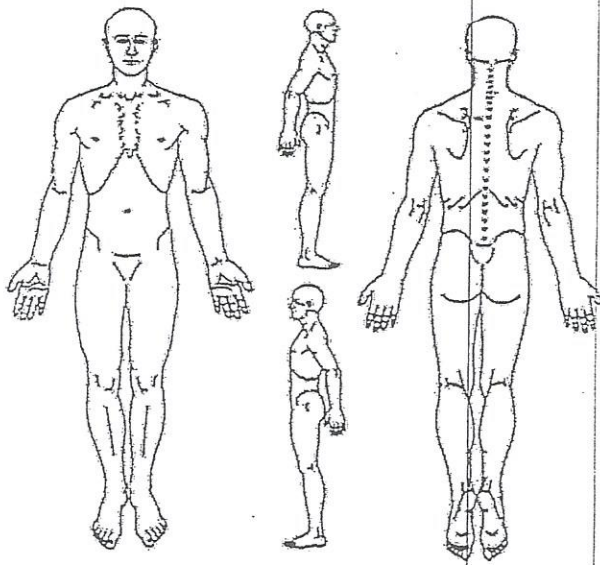

### Baseline Pain before Procedure

Pain Map: Please shade painful areas with a pen. Describe pain symptoms as they exist before the block:

Pain Scale: 0 (none at all) – 10 (worst)

Bottom portion to be completed after the procedure

Bottom portion to be completed after the procedure

### Diagnostic Block Evaluation

Pain map: Please shade painful areas with a pen. Describe pain symptoms after the block:

1 hour:

3 hours:

8 hours:

24 hours:

3 days:

Much worse—Worse—Same—Better—Much better

Patient remarks:
